**Comments on IBRD's *South Africa: Eskom Renewables Support Project*
from Nile Basin Discourse in Rwanda**

Dear Colleagues, I hope you are all doing great.

However, in above mentioned project, I am not seeing clear partnership and roles of CSOs and other local communities as beneficiaries. This needs to be addressed for the benefits of the vulnerable communities in a form of win-win strategy or a cost sharing plan to promote visible and mutual gain of communities from this project.

Thanks

Mr. John Gakumba Bosco
