Comments from IDB to United Kingdom on Approval by mail: Brazil: Forest Information to Support Public and Private Sectors in Management Initiatives (IDB)

We are sorry for the confusion regarding the inactive links on the Technical Cooperation Document related to the project “Forest Information to Support Public and Private Sectors in Management Initiatives”.

As requested through the CIF Administrative Unit on date October 10th we have sent all the documents in pdf version. For these documents, listed in Sections IX and X of the Technical Cooperation Document, there is no requirement of translation in English for the IDB Board. This is because they are mainly related to project operative aspects, as in the case of the Operational Manual.

We do understand that an informed decision need to be made by the Board members, and for this reason we would like to know which specific documents UK representatives would like to have translated in English.

Furthermore, we believe that a discussion over the phone to clarify issues related to the project would be helpful. In many cases, not only for FIP but also for CTF projects, we have found very useful to have the possibility to exchange views and clarify projects aspects through technical discussions.

Regards

Gloria Visconti
