

# The Effective Deployment of Mitigation Finance: The Experience of the CIF

Panel discussion at CoP 21

December 7<sup>th</sup> 10:00-11:30

Room 2, Africa Pavilion

The discussion will:

- Identify vehicles and approaches that can deliver the financing necessary to close energy funding gaps in developing and emerging economies
- Explore how an enabling environment can be created to leverage private sector financing
- Provide examples of countries that have effectively utilized scaled-up climate financing

Having mobilized US\$ 6bn for global, targeted investments in clean and renewable energy, the Climate Investment Funds will identify key lessons and approaches that enable the effective delivery of climate finance to support country-driven efforts to deploy renewable energy at scale. Panelists will discuss how concessional climate finance can be targeted to unlock investment for low carbon development.
