

**APPROVAL BY MAIL: MOZAMBIQUE: SMALLHOLDER IRRIGATION FEASIBILITY PROJECT
(IFC)**

Comments Received from Japan

April 22, 2015

Dear colleague,

Kindly please find below comment from JICA (Japan International Cooperation Agency).

In Mozambique flood control measures have not been developed well. Some of JICA projects regarding irrigated rice farming in Mozambique received flood damage. As a result, directions of the projects could not help being modified. In determining optimal locations for water reservoirs and catchments, it is highly recommended to comprehend past flood records and flood control measures around the sites.

Thank you for your kind attention.

Kind Regards,
Taro Kimura, MOF Japan
