**FIP Pilot Country Meeting
Kinshasa, June 25th 2015**

Monitoring and Evaluation

What are expected results?

- **Expected results...**
 - Are a commitment to achieve a specific and better quality or level of service over a specified time frame
 - Allow performance to be assessed
 - Vary according to the indicator for which they are set and the level of certainty and predictability of the phenomenon being measured

What are expected results?

- Modeling tool to help develop project proposals
- Marketing tool to encourage donors to accept proposals

Design (pre-project)

Project execution

Evaluation (post-project)

- Management tool to help improve and evaluate performance
- Tool that allows all stakeholders to monitor and control project progress

- Tool to evaluate the performance and the achievements of project goals/targets

2. What have been your key challenges and what opportunities for improvement									

THEME 2.1: BIODIVERSITY AND OTHER ENVIRONMENTAL SERVICES													
Scorecard 2.1 provides a qualitative assessment of how FIP interventions have contributed to reduced or avoided loss, or enhancement of biodiversity and other environmental ecosystem services. Please score the criteria below using scores from 0 to 10. This scorecard should be completed by a small scoring team at the level of the investment plan. It should be validated during a wider annual multi-stakeholder national-level steering committee/work-shops meeting on progress with the implementation of the FIP investment plan (see page 17 of the toolkit).

Q2. What have been key contributions (successes) of FIP interventions regarding biodiversity and other environmental services in your country context during this reporting year?													
Q3. What have been your key challenges and what opportunities for improvement do you see?													

The FIP Monitoring and Reporting Toolkit is designed on the basic principles of flexibility, pragmatism and efficiency, using existing national or sub-national monitoring systems where possible. It provides a structured approach that can support countries in their efforts to report on REDD+ benefits in the context of the FIP.

Themes to report in FIP reports

Category 1: Common themes

Theme 1.1: GHG emission reductions or avoidance/enhancement of carbon stock

Theme 1.2: Livelihood co-benefits
