

Financing Resilience and Adaptation: Lessons from the CIF

Panel discussion at CoP 21

December 2nd 12:00-13:30

Room 2, Africa Pavilion

The discussion will:

- Share lessons on the programmatic approach adopted by the CIF, highlighting its relevance to climate finance
- Showcase successful examples of resilience and adaptation project implementation
- Share early experience on engaging the private sector in resilience and adaptation project financing

Having amassed considerable experience with the Pilot Program for Climate Resilience, the Climate Investment Funds (CIF) will share lessons from its resilience portfolio via country voices. These country experiences can help inform the adaptation and resilience discussions taking place at the CoP.
