

Landscapes: Insights from the Field

TCLP Workshop Session 2 Breakout

Where can transformational change concepts and practices address climate change challenges?

Tuesday, May 25, 2021

Landscapes Breakout Objectives

- Locate transformational change concepts in a real case studies, and in turn, identify emergent action that can inform the concepts
- Distill insights on how to identify dimensions of transformational change and how these dimensions collectively support more advanced transformational change
- Provide interactive opportunities for participants to build on case study insights by drawing on their own experiences and knowledge in this area
- Begin to identify what products and processes will need to be developed further to support transformational change

Landscapes Breakout Speaker

NACIBE CHEMOR
ROSS STRATEGIC

Contribution of the FIP to Mexico's forest and climate goals

Nacibe Chemor, Ross Strategic

Country context and Challenges

- Deforestation and forest degradation tied to activities outside of forest sector
- Low economic value

- Diversity on land tenure and stakeholders

- Limited land use planning and unaligned priorities on the rural sector

- Inadequate, insufficient finance for forest activities leading to sector competition

- Weak governance structures and lack of management and organizational capacities

Innovative pathways

Design relied on stakeholder consultation and participation

Country leadership and alignment with national goals

Programmatic approach from the national broader climate finance scheme

Capacity building led at territorial level

Risk mitigating financial models

Productive activities under a Landscapes approach

Where can we see Transformational Change?

Figure 2.

PROGRESS TOWARD TRANSFORMATIONAL CHANGE ACROSS DIMENSIONS

Source: Author's own work, adapted from "CIF E&L Initiative. Transformational Change Concepts (Unpublished Draft)" and "CIF E&L Initiative. Signals of Transformational Change (Unpublished Draft)".

Where can we see Transformational Change?

- Alignment with national climate policies and priorities
- National and international coordination

- Demonstrative effect: sector profitability
- Cross-sectoral and institutional coordination
- Mainstreaming of gender perspective

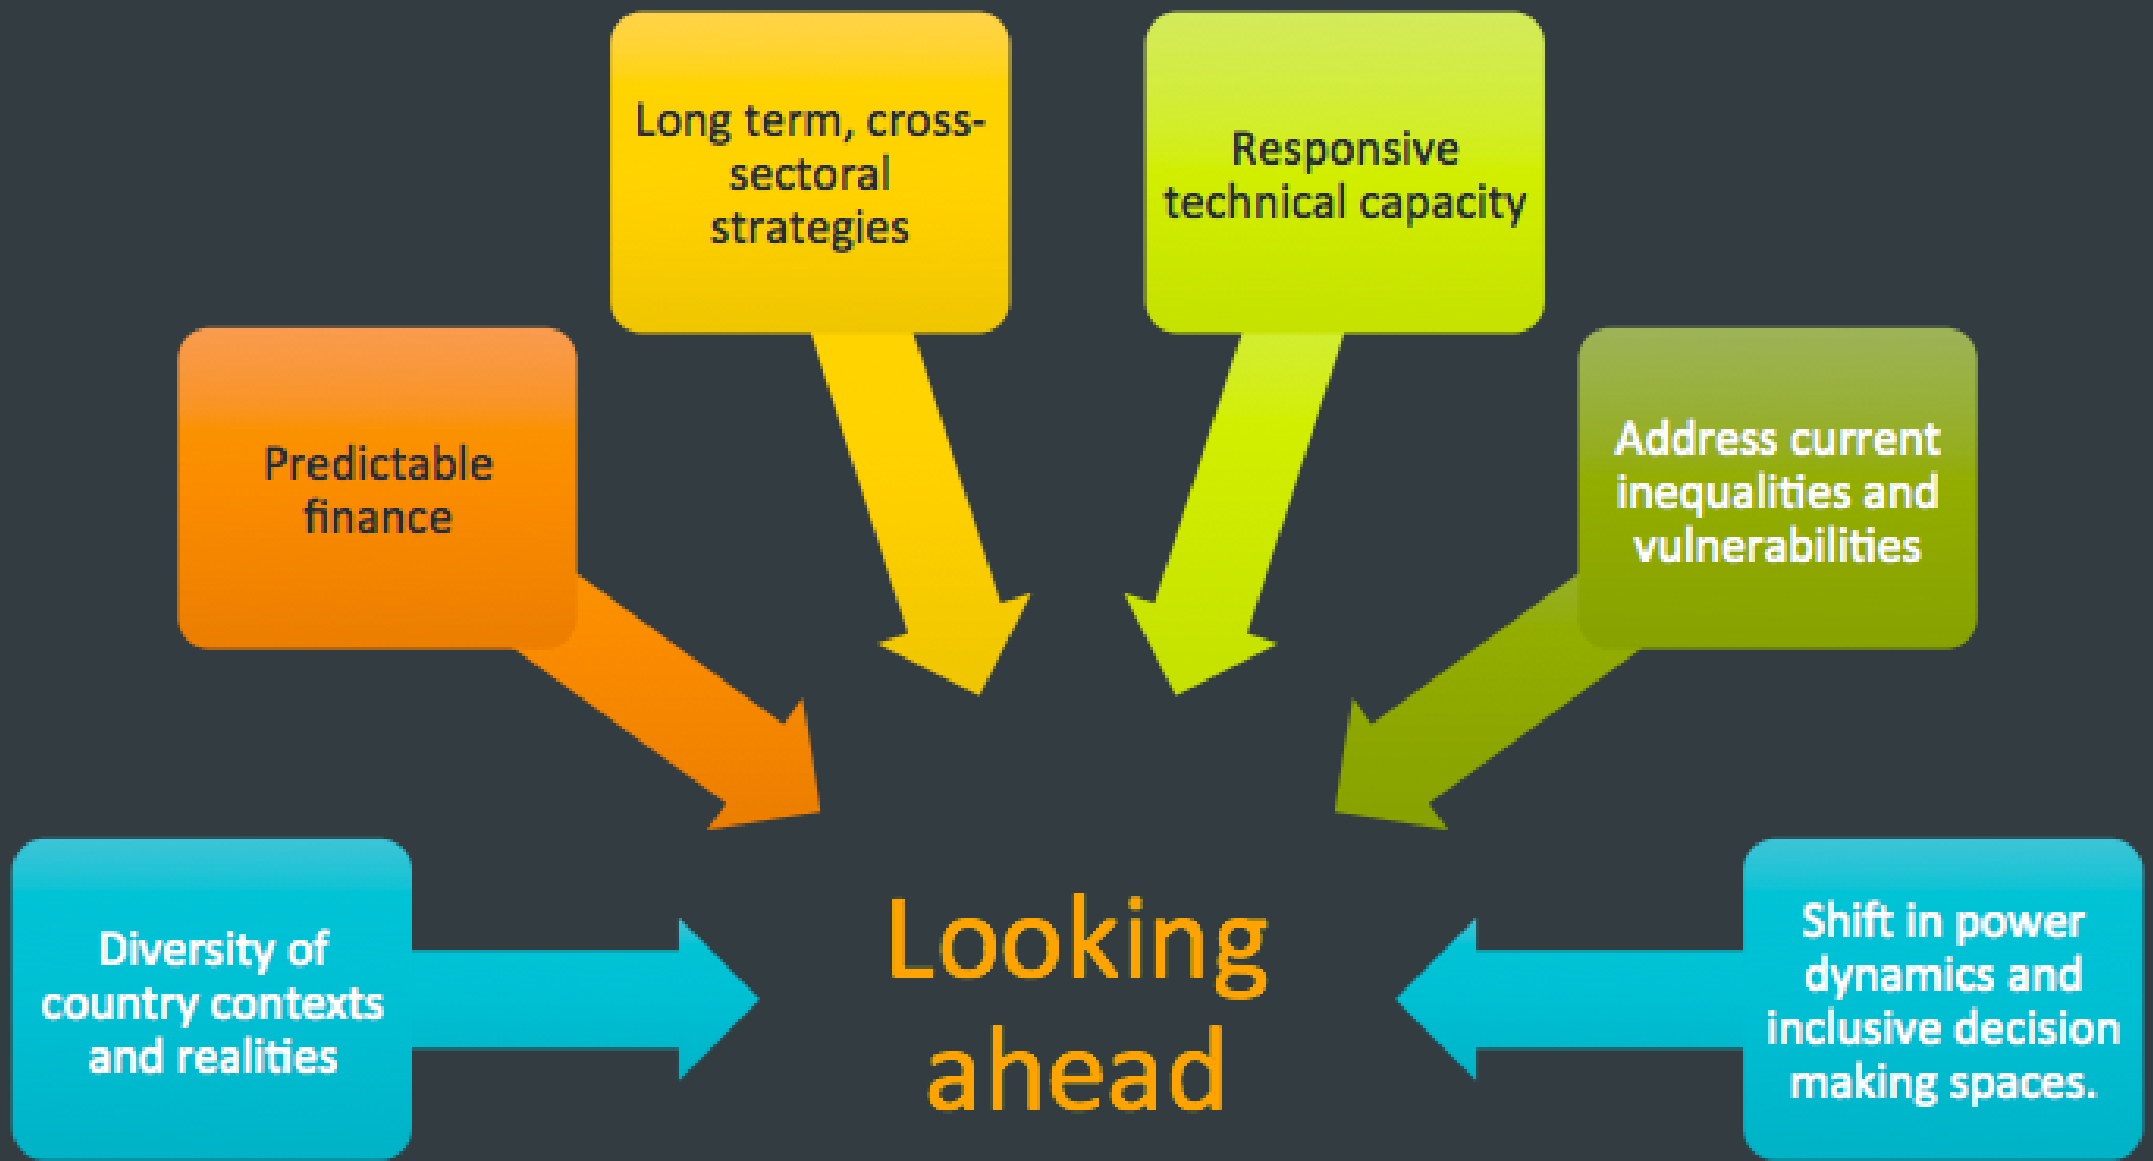

- Record time: design and approval
- Pertinence of activities

- Private finance increased

- Financial inclusion
- Capacity development for institutions and individuals

Joining the TCLP Workshop Tomorrow

Tomorrow the workshop will begin in these small groups.

You will join the workshop with a different link:

<https://rossstrategic.zoom.us/j/96475804345>

Meeting ID: 9647 580 4345

**See you back in the main
meeting in a few
seconds!**

Landscapes: Moving from Emergent to Advanced Transformational Change

TCLP Workshop Session 3

Wednesday, May 26, 2021

Landscapes Session 3 Objectives

- Identify insights that can advance thinking and action on transformational change and landscapes initiatives, drawing from the Mexico case study and participant knowledge
- Identify powerful questions that can help practitioners consider key dimensions of transformational change in the design, implementation, and evaluation of programs and projects
- Begin to identify what tools, processes, and experimentation are needed to support transformational change

A few technical reminders...

 The meeting is being recorded.

 Mute your microphone while others are speaking.

 Raise your virtual hand to contribute to the conversation.

 Allow everyone the chance to speak and listen actively to understand others' views.

 Chat directly to **Tim Larson** if you need technical assistance.

slido

What is one key takeaway you have from yesterday's workshop sessions?

 Start presenting to display the poll results on this slide.

TCLP Dimensions of Transformational Change in Climate Action

Small Group Discussions in Breakout Rooms

Small Group Work in Mural

- You will be invited to join a breakout room with a few other participants
- Together, you and your group will focus on two activities in Mural:
 - First, review and add to the **Key Insights for Advancing Transformational Change Related to Landscapes** section drawing from the case study shared yesterday and/or your own experiences and knowledge 5 min
 - Second, identify **Powerful Questions to Inform the Movement from Emerging to Advanced Transformational Change** in the design, implementation, or assessment of landscape initiatives and projects using the dimensions of transformational change as a framework 25 min

TCLP May Virtual Workshop | Session 3: Moving from Emergent to Advanced Transformational Change

[INSERT BREAKOUT GROUP NAME]

Facilitated by:

GET FAMILIAR WITH MURAL

Navigation
 To get started, click on the Mural icon in the top right corner of the screen. You can also click on the Mural icon in the bottom right corner of the screen.

Collaboration
 You can use the Mural toolbar to add sticky notes, text, images, and other content to your Mural. You can also use the Mural toolbar to move, delete, and duplicate sticky notes.

Customization
 You can use the Mural toolbar to change the color, size, and font of your sticky notes. You can also use the Mural toolbar to change the background color of your Mural.

2 Key Insights for Advancing Transformational Change (5 minutes)

When insights related to advancing transformational change did you draw from the [insert case study; e.g., Turkey energy efficiency case study] and other [insert breakout focus; e.g., energy sector] transformation experiences (presented yesterday in Session 2)? Type insights into gray sticky notes below.

If you'd like to show agreement with a thought below, raise a dot to that sticky note.

4 OPTIONAL: Ideas for Using these Questions

What tools, processes, and experimentation need to be developed to support use of these types of questions to support the design, implementation, and evaluation of initiatives, programs and projects with transformation in mind? Type thoughts into gray sticky notes below.

If you'd like to show agreement with a thought below, raise a dot to that sticky note.

3 Powerful Questions to Inform the Movement from Emerging Advanced Transformational Change (25 minutes)

What kinds of questions related to each dimension should climate finance program and project designers and implementers be asking to support processes and outcomes to move toward more advanced transformational change in the [breakout focus] area? For general questions that guide the movement from emerging to more advanced transformational change please use light yellow sticky notes in the "General Questions" row at the bottom.

If you'd like to show agreement with a thought below, raise a dot to that sticky note.

	Breakout 1	Breakout 2	Breakout 3	Breakout 4	Breakout 5	Breakout 6	Breakout 7	Breakout 8
Relevance Aligns with and addresses a high-impact goal and context								
Systemic Change Presents and/or tests new systems, structures and functions								
Speed Accelerates in pace to achieve appropriate speed of change								
Scale Considerably large change processes and impact								
Adaptive Sustainability Robustness, resilience, and adaptiveness of change								
General Questions to guide the movement from emerging to advanced transformation

Zoom Settings

- 1 Learn MU
- Get familiar learn how to the whitebo
- 2 Key Insight
- 3 Powerful
- 4 Optional

Using Mural

- Use the Outline on the right of your screen to easily navigate to specific sections of the Mural board
- To zoom in and out, either use your mouse or the tool on the bottom right of your screen (which also allows you to move around the Mural board)

Working in Mural

- Each breakout group will work in one column of the dimensions table
- You can move dots to sticky notes with thoughts you'd like to second, or "upvote"

If you'd like to show agreement with a thought below, move a dot to that sticky note.

Relevance

Alignment and attentiveness through time to goals and context

Systemic Change

Fundamental shifts in system's structures and functions

Speed

Accelerate impacts to achieve appropriate speed of change

Scale

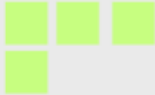

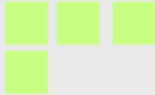

Contextually large change processes and impact

Adaptive Sustainability

Robustness, resilience, and adaptiveness of change
