Dear Mafalda,

We appreciate the opportunity to review this interesting project. Many of our questions have already been raised by other PPCR committee members, so we will await the answers in preparation.

We have seen the response of ADB to questions from the UK on resettlement issues. We appreciate the response from ADB but would like to underline the importance of putting in place adequate systems for monitoring and responding to resettlement issues, in the event that they should they arise.

Thank you,

Katie Berg
U.S. Treasury Department
