

## Addressing Drivers of Deforestation and Forest Degradation: integrating Forests and Landscapes

Laurent Valiergue

June 24, 2015

## **Deforestation and forest degradation** Drivers and vision to reverse the trends

### **Democratic Republic of Congo:**

Focus on the Kinshasa supply basin:

Mai N'Dombe Province (Plateau and Mai N'Dombe districts)

## **Republic of Congo:**

Focus on the Northern Congo:

Likouala and Sangha Departments

# **REDD+ Strategies**

# **DRC example**

## **3 sectoral pillars**

Agriculture

Energy

Forest

## **4 enabling pillars**

Demography

Governance

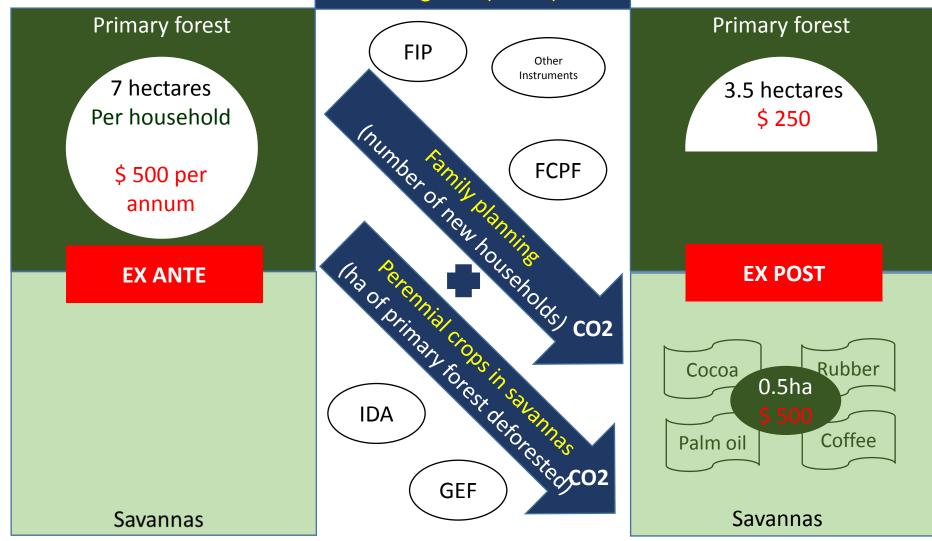

Land planning

Land tenure

# **Deforestation in Congos (DRC / RoC):**

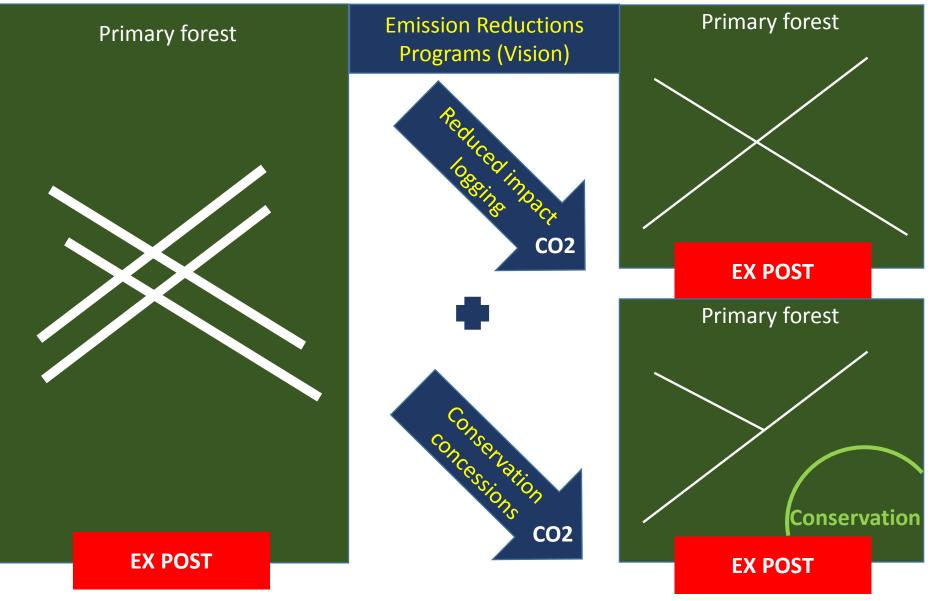

Slash-and-burn agriculture and demography

Emission Reductions Programs (Vision)

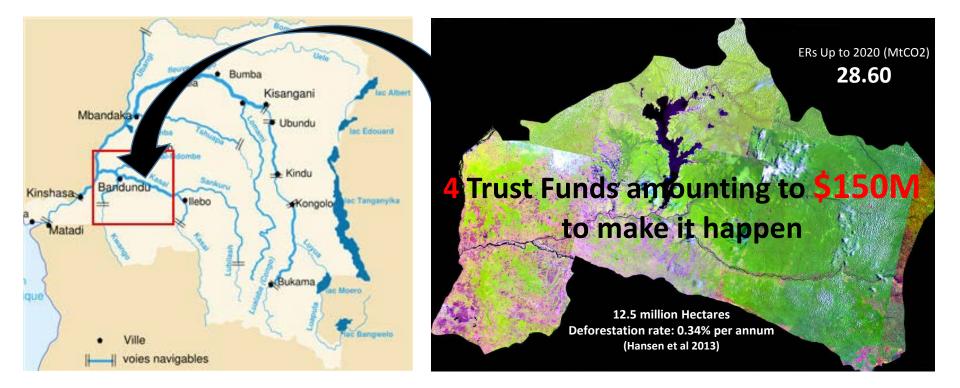

# Forest Degradation in Congos (DRC / RoC):

### Logging

# Focus on the Kinshasa supply basin: the Bandundu Province (Plateau and Mai N'Dombe districts)

#### **Private Sector**

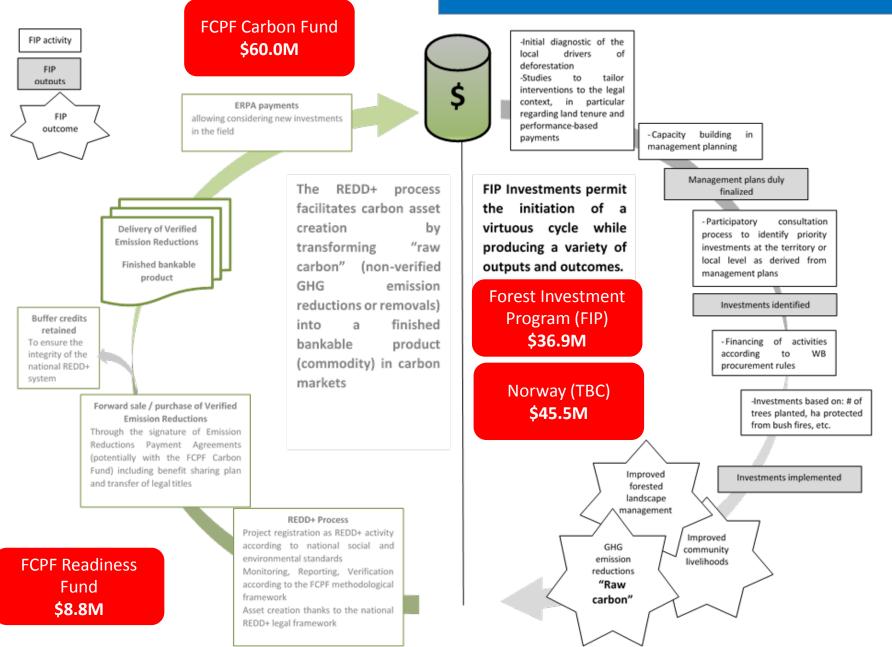

- Reduced impact logging
- Conservation concessions

### **Rural Communities**

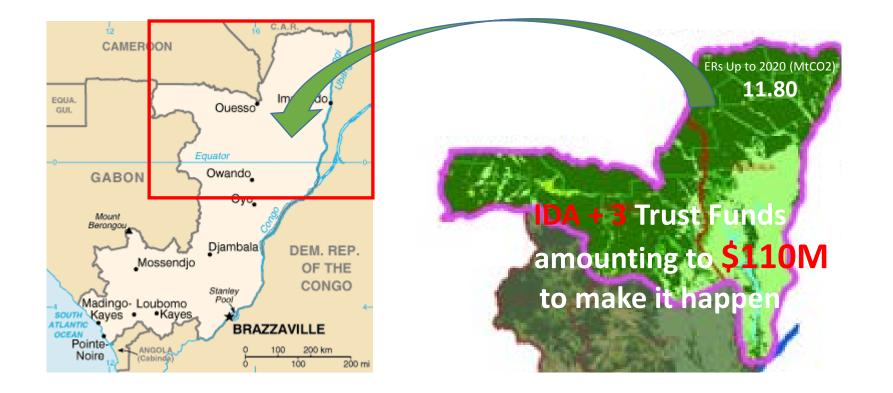

- Agroforestry and innovative production systems as both an alternative to slash-and-burn agriculture and a source of sustainable fuel wood

### 4 Trust Funds to make it happen

### ERs Up to 2020 (MtCO2) 28.60

# Focus on the Northern Congo: Likouala and Sangha Departments

#### **Private Sector**

- Reduced impact logging
- Conservation concessions

### **Rural Communities**

- Agroforestry and innovative production systems as both an alternative to slash-and-burn agriculture and a source of sustainable fuel wood MERCI
