**Comments from United Kingdom on Approval by mail: Building Climate Resilience in the Pyanj River Basin Project –Tajikistan**

Dear CIF Admin Unit,

Thank you for the opportunity to comment on the Building Climate Resilience in the Pyanj River Basin Project. – the UK is happy to approve this project. Please see below some further comments:

- We are pleased that the project will be coordinated with other interventions in Tajikistan where there is potential overlap. This should ensure complementarity.
- The project has a strong gender dimension with specific plans in place to target women. We are pleased that results are disaggregated by gender.
- Good that the results set out the expected numbers to be reached, and are in keeping with the PPCR core indicator.
- Good that there are additional indicators on hectares protected.

Kind regards,

Su-Lin Garbett-Shiels - on behalf of Anna Bobin (cc'n)
